some events have come to pass

CHAIN OF EVENTS:

Unrest is rising quickly due to natural opposition that will be boosted by media propaganda, psy op, and other black projects. These include but are not limited to a sudden rapid gun right revocation and or seizure, as well as anger over forced healthcare costs among other created tools of division.

This is on the eve of a partial or complete ***gov shutdown. Welfare and other survival based benefits may cease(***=still being debated). The length of time and extent these services cease is not as important since they will be accompanied by "boosters" soon if not almost immediately.

Soon after these first events come the major catalysts. This is the best approximation I am able to provide at this time.

NOTE:*** Legitimate war seems to have at the very least been postponed as it was decided that for now it will not achieve what is desired. As always though, it will continue to be used as a distraction, and one cannot rule out last minute "events" as we know plans change. Also order of events may change.*NOTE*

Soon after the first events the bio emergency will take place. Do not wait for the aired warning. It is hoped this will began

panic. In quick succession a "bank holiday" or worse will take place under the guise of avoiding system collapsing bank runs. Sadly this bio event will be legitimate. The previous "bio scares" were in fact nothing more than a test of various methodologies and practices in preparation for this.

All angles of the entire prior controversy surrounding the vaccines was engineered. Those that participated in public outcry and protest were noted and logged. Those who did not receive any vaccine are still at high risk, only avoiding immediate sickness from said vaccines, and changing what effect the final agent will have on their system. Those who did receive the vaccines were logged as "event centers" and in fact used as biological incubators with the direct purpose of mutating the early agent and initiating "biological marking". The purpose of this "biological marking" was to prime certain groups of people for the final agent. Also understand this agent has a huge DNA/genealogy component.

This exact campaign was done in different stages using different agents while being adjusted to fit criteria unique to area of operation(RACE, CULTURE, TABOOS, FOOD, ANIMALS, ETC)all over the world. When deemed not highly beneficial in any area, area will be marked for a unilateral "reset".

If "elements in power" did not want to take part it was done anyway, adding to backdoor

tensions between global power brokers. This entire subject and subsequent consequences is one of the main reasons a mass unified r e v o l u t i o n will not be able to take place.

Much like the pilot episode of "The Lone Gunmen" and the subsequent false flag we are and have been "prepped" via the "Zombie Phenomenon" such as "World War Z" as well as many other recent contagion based entertainment.

The chaos caused will then be given a "fermentation period". Refer to the movie "The Purge". Soon after, the lock down begins, where camps will be promoted as safe havens. Camps are in fact divided further into different purposes. Some for the willing, uninformed, homeless/illegal, race/genetic lineage and then for the "unruly".

Once the lock down is fully achieved, full control (world wide "black out") of communications will be activated.

(SIDE NOTE)Realize that the digital age we live in was not a natural evolution, but by design. The goal was to force as much of the world as possible to be dependent on digital communications. Making it hard to function without it even at the most basic of levels. Those that had no common place access to such tech suffered immediately. Those that that have been consumed and integrated, are now the most at risk. You can begin to see the entire

timeline of digitally induced degradation.(SIDE NOTE)

If plans go forward unhindered, it is in this time(BLACKOUT) the truly horrific atrocities will take place. Atrocities not limited to wholesale slaughter of civilians, 3rd world exterminations, mass "leader removal", and limited to permanent G.A.I.A.(Geological Area Irradiation Actions).

There is more to this but lets move on.

There will be other events used to cause greater chaos. There will be astrological and other "odd" events that will occur. Increased meteors and strikes, coupled with the possibility of contagions spread by them, earth quakes setting off volcanoes, and other assorted "doom porn". There will be strange metaphysical events such as plains of existence colliding. There will also be pseudo military and other actions taking place which will be used and promoted to mimic Biblical "end time" prophecies.

You must understand these are "created" to mirror many religious beliefs, such as the bio threat being one of the Biblical "Horsemen". This with others are being used to aid in self destruction. Couple this will the global energy shift "short circuiting" people the odds are stacked against us, for we are in the "Destroyer Cycle".

The goal is to create what appears to be a complete worldwide breakdown/destruction. Out of which the elite will proclaim that they have indeed learned their lessons, and seen the errors of their past ways. The new world order will be born, and all of the worst forms of control will be implemented under guise of preventing all this from happening again. Tried and true formula will once again resurface.

*World wide reset= Mass depopulation, unpopular history destruction, blaming anything from past that will not help them in the future.

*Reinvent into something New= New living language(unified and forced), New savior/creator/religion, New law and money system

*Forced re-education= Everything you knew was wrong, never forget, never forget what we tell you to remember as fact.

Will clarify when asked.

must find ones rated for viruses as well as other agents. There are affordable ones on there that meet this criteria.
